chilton county

Chilton County: A Socio-demographic Profile

ABOUT THE AUTHORS

Brian E. Johnson is an Assistant Professor of Geography in the Department of Sociology at Auburn University at Montgomery. He earned his Ph.D. in Geography at Indiana University in 2010. Dr. Johnson researches density restrictions in municipal zoning, migration into central city neighborhoods, misalignments of neighborhood covenants with local preferences, and drivers of exurban development. He has published in journals such as GeoJournal, Urban Geography, Geographical Bulletin, Spaces & Flows: An International Journal of Urban & ExtraUrban Studies, Qualitative Research, and Journal of Transport Geography. Dr. Johnson has taught advanced courses in population geography, urban geography, and economic geography. Before joining the AUM Center for Demographic Research, he taught at Boston University, Salem State University, and Rhode Island College. He is an active member of the Association of American Geographers and co-chair of the Stand Alone Geographers Affinity Group.

Yanyi K. Djamba is Director of the Center for Demographic Research and Professor of Sociology at Auburn University at Montgomery. He received M.A. and Ph.D. degrees in Sociology from Louisiana State University. He has previously worked at the Population Research Center, University of Texas at Austin; the Population Studies and Training Center, Brown University; and Southeastern Louisiana University, where his last position was Associate Professor and Coordinator of the Applied Sociology Graduate Program. Dr. Djamba has received many professional awards and grants from different sources and has served as consultant to a variety of organizations, including the United Nations. He has published several books and many articles in peer-reviewed journals. Dr. Djamba is a member of many professional organizations, including Southern Demographic Association, Population Association of America, American Sociological Association, International Union for the Scientific Study of Population, International Sociological Association, and International Association for Time Use Research.

This report details the population characteristics of Chilton County, a place located in central Alabama. Knowledge of a place's population makeup is important to both those who live and work there as well as potential investors, workers, and residents. With population data, business owners can identify both purchasing and labor markets, government officials can accurately plan for their citizens' needs, and residents can better know their community. Population data are very useful in promoting a place to businesses searching for production, distribution, and sales sites. Population data also can be used to promote a place to potential new residents. New businesses and residents are of concern to government officials tasked with forecasting tax revenues and planning public infrastructure and services provisions.

This report informs interested parties about the characteristics of Chilton County's population in five important topic areas. First, it describes the number of persons in Chilton County, the surrounding area, and major settlements. Second, this report describes the age structure and ethnic makeup of the population. Third, it gives detailed information on the county's income and educational attainment. Fourth, this report describes housing affordability, household composition, and migration. Last, the report addresses economic activities including employment, commuting, and economic sectors.
